## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over SCHAFHEUTLE et al. (5,646,236), a reference cited by Applicant. The reference's invention is directed to a polyester and its use as an additive in a coating composition. The reference discloses that the coating composition is a cationic electrodeposition coating composition in a quantity of from 0.1 to 5 wt% based on the resin solids composition (col. 5, lines 41-58); the polyester has an acid value of less than 35 mg of KOH/g (paragraph crossing cols. 4 and 5 and col. 2, lines 14-43); and the polyester obtained by reacting different and long

hydrocarbon components (col. 1, lines 55-65 and col. 2, line 66 through col. 3, line 65). As such, the reference discloses numerical ranges of the additive that touch, overlap or lie within the claimed range. The disclosure in the prior art of any value within the claimed range is an anticipation of that range. And where the range overlap disclosed by the prior, the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the reference's teachings because overlapping ranges have been held to be obvious, *In re Wertheim* 191 USPQ 90.

As to the subject matter of claim 6 and 8, the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the reference's teachings because it has been settled that proper adjustment of a known effective variable of a known or obvious process is within the capabilities of one having ordinary skill in the art. *In re Aller* 105 USPQ 233; *In re Boesch* 205 USPQ 215.
